

Newton

# Solutions Guide

Software, Peripherals and Accessories  
for Newton PDAs

# Suddenly Newton understands everything you write.

All you need is Graffiti®. The fastest, most accurate way to enter text on a Newton.™ Guaranteed. How fast? Try over 30 words a minute. How accurate?

About 100%.

And Graffiti takes only twenty minutes to learn. That's because it's really just a simplified version of the same alphabet you learned in the first grade.

And here is what some of the over 20,000 real users are saying about Graffiti:

*"Graffiti makes a useful device twice as useful. I now use my Newton constantly."*

*"I can take notes at a meeting as fast as I print... Every bit as fast as paper and pen."*

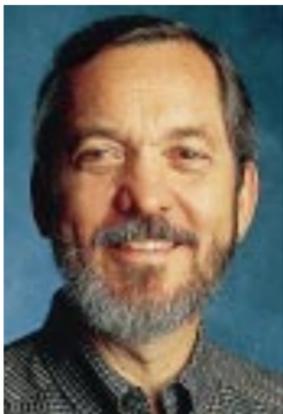

*"I have been using my Newton much more than before because Graffiti makes it much easier to enter data on the fly."*

*"Just received Graffiti. It's all they claim and more. I think it's a must for Newton."\**

**See for yourself how much you need Graffiti. Call 1-800-881-7256 to order Graffiti for only \$79—with a 60-day money-back guarantee. From outside the USA, please call 408-848-5604.**

Welcome to the premiere issue of the Newton Solutions Guide, a resource designed to provide you with the latest information on hardware, software, and accessories for the Newton platform.

Apple Computer's Newton team spent a great deal of time listening to customers like you in the last year. Your feedback has resulted in significant improvements and advanced capabilities in this new version of the Newton operating system. Newton 2.0 is loaded with features that you've requested, from best-of-class management capabilities to built-in wireless communications and better integration with your Windows and Mac OS computers. Also, we are working with third-party developers to insure that you will always have the most compelling solutions from which to choose on any PDA platform. The Newton Solutions Guide is designed to help you more effectively find the best mobile solutions to help you organize your life, communicate with others, and integrate information no matter where you travel—down the hall, across the state, or around the world.

Thank you for choosing the Newton platform. We look forward to bringing you a variety of exciting new features and solutions in the coming year.

# Introduction

## The Newton Solutions Guide

The Newton Solutions Guide is a compendium of hardware, software, and accessories for use with Newton® personal digital assistants (PDAs). From personal productivity software to development tools, this guide includes up-to-date information on the newest Newton 2.0 products and solutions that can help you work more efficiently and effectively.

## The Newton Platform—Setting the Standard for PDAs

In mid-1993, Apple® Computer, Inc. launched the first Newton device, the Apple MessagePad™, ushering in a new class of computing products—the personal digital assistant. More than just an electronic organizer, Newton PDAs are powerful hand-held devices that provide mobile professionals and corporate users with an intelligent operating system, seamless desktop connectivity, and a wide variety of easy-to-use software solutions. Since the introduction of the first Newton-based PDA, scores of products have been developed to expand the range of Newton mobile solutions. Motorola, for example, has combined its expertise in wireless communications with the Newton platform to deliver the Motorola Marco Wireless Communicator, a hand-held Newton PDA with a built-in wireless modem. Many other products based on the Newton 2.0 operating system will be introduced in the coming year.

Mobile professionals have been adopting Newton PDAs because of the ease in which they're able to organize, communicate, and integrate information with others while they're away from their desks. The Newton platform's intuitive interface and large selection of productivity solutions help mobile professionals get more work done in less time.

# Introduction

Value-added resellers and systems integrators value the Newton platform, because its robust object-oriented operating system provides them with a powerful foundation for building custom business solutions. This platform offers state-of-the-art technologies for capturing and managing information, easy procedures for transferring information to and from Mac OS and Windows personal computers, and a broad selection of communication options.

During the last two years, no other PDA platform has achieved as much support and enthusiasm from users and industry leaders: The Apple MessagePad has won a number of awards, including *BYTE Magazine's* "Best Hand-held Product of the Year" for the second year in a row, and similar awards from *Computer Currents* and *Fortune Magazine*.

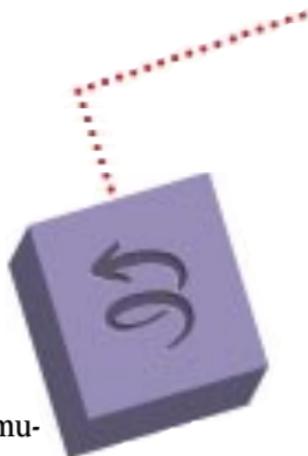

## For Organizing Your Life

If you're a person who spends a lot of time away from your office, Newton PDAs provide you with the best and broadest capabilities for capturing and organizing personal and work information. The system's flexible interface allows you to enter information in the manner that works best for you—whether you prefer the system's built-in handwriting recognition feature, the on-screen keyboard, or a plug-in keyboard. Applications built into every Newton device help you intelligently manage contacts, dates, and information. And you can add specialized functions by using any of the hundreds of commercial and shareware applications available. Whether you need to track expenses, pay bills while out of town, monitor e-mail and voice mail accounts, track billable hours, or access reference materials while on the road, the Newton platform is the most powerful and flexible hand-held device on the market today.

## **For Communicating With Others**

The Newton Operating System was designed from the ground up with a powerful communication architecture. Built-in capabilities, such as eWorld™ electronic mail and fax reception, let you stay in touch while at home or away. And recent alliances between Apple and third-party providers have created more ways for you to communicate with others without having to plug your Newton device into a telephone jack. You can send and receive data using the wireless communication technology that best suits your business's needs: digital cellular, radio frequency (RF), paging, or infrared (IR).

## **For Integrating Into Your Work Environment**

The rate of Newton adoption among businesses is growing rapidly because of the large selection of vertical solutions available and the ease in which Newton devices can interface with Macintosh computers, Windows™-based PCs, and corporate host computers. Businesses can choose from the hundreds of targeted business applications available today, in fields such as health care, field services, and sales.

The Newton platform's powerful operating system and development tools enable system integrators, in-house developers, and value-added resellers to build custom software solutions in far less time than on other PDA platforms. For complex applications, the Newton Toolkit provides developers with a high-level object-oriented development environment. Off-the-shelf solution tools enable business users to do everything from browsing the Internet, to remotely accessing data from corporate databases, to gathering data with bar code readers. And for the creation of electronic books, travel guides, reference manuals, and corporate documentation, Newton Book Maker provides content providers with an easy, cost effective way to deploy information to Newton users.

# Introduction

## How This Guide Can Help

**N**ewton leads the industry as the most advanced, easy-to-use PDA platform, offering the best selection of mobile solutions on the market today. Whether you're a mobile professional, an in-house developer, or systems integrator, *The Newton Solutions Guide* provides you with an excellent overview of these products. Taking time to browse through this guide of both Apple and third-party products is a worthwhile investment—it's the most efficient way to find the solutions to satisfy your unique needs.

You can also access this guide on Apple's Internet home page at <http://www.info.apple.com/newton> or on eWorld by entering the shortcut "Newton".

## Product Categories

**P**roducts in this guide are organized alphabetically under the color-coded sections listed below. You can quickly locate a category by looking for the corresponding color bar printed at the top of each page.

### INFORMATION MANAGEMENT

These products help you track and organize information such as contacts, expenses, and billable hours on Newton PDAs.

### DESKTOP INTEGRATION

Use these applications to organize, manage, and synchronize information between Newton devices and personal computer systems.

### COMMUNICATIONS

From PCMCIA modems to wireless communication options, these products enable you to send and receive information via a variety of modes and industry standard protocols.

### NEWTON ACCESSORIES

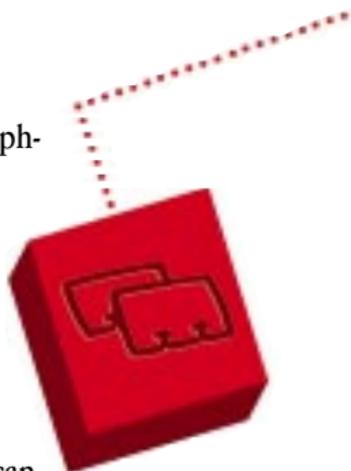

Customize your Newton device with these peripherals, pens, and carrying cases.

### VERTICAL MARKET SOLUTIONS

Choose from a broad selection of vertical market solutions in areas such as health care, financial services, GPS systems, education, and outside plant to improve your company's efficiency. This section also lists consultants who can help you create specialized solutions for your business.

### NEWTON SOFTWARE DEVELOPMENT

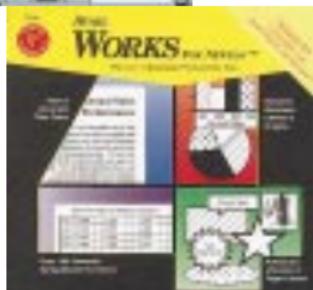

From easy-to-use solution tools to developer kits, this section provides you with information that can help you develop Newton-based software solutions. Newton contract programming, support, and training organizations are also listed here.

# AvailWorks

## The 4-in-1 Business Productivity Tool!

**A**vailWorks will improve the effectiveness of any document that you fax, print, beam, or mail from your Newton device. It's the only Newton software available to integrate fast and accurate text processing, powerful spreadsheets (with over 100 built-in functions), dynamic business charts and graphs, and advanced drawing and page layout tools into one convenient package for the Newton. AvailWorks makes it a snap to lay out a full-size page for faxing or printing. What you see is what you get!

### FEATURES

- ▶ Four integrated modules: Text, Spreadsheets, Drawings, Graphs
- ▶ WYSIWYG full-page layout
- ▶ Hit To Screen View for fast, easy editing
- ▶ Clip-art capability (sample libraries included)
- ▶ Runs on Newton 2.0 operating system

### REQUIREMENTS

Any Newton device running Newton 1.x operating system or later. Macintosh and Windows disks, plus installation software are included.

SRP: \$79.95. Includes AvailWorks application, two utility programs: the AvailWorks Viewer and PCMCIA Fax Modem Utility, plus sample ClipArt libraries.

#### Avail Technology, Inc.

1250 Oakmead Pkwy., Suite 210

# Leverage

## Create Databases Easily with Leverage

Leverage is the multifile database specifically designed for the Newton platform. Leverage emphasizes easy custom database creation, yet it is powerful enough to implement demanding applications.

Leverage supports selection, sorting and reporting. It provides a simple linking mechanism to make information in one database accessible to another. The interface makes efficient use of the screen space and helps speed input.

With Leverage, you can take your information with you.

### FEATURES

- ▶ Synchronize with desktop databases
- ▶ Print reports with totals
- ▶ Calculate fields
- ▶ Pop-up lists of any length
- ▶ On-screen totals
- ▶ Paragraph fields
- ▶ Beam and e-mail data
- ▶ Queries by example
- ▶ Programmable
- ▶ Nine field types
- ▶ Helpful 300 page manual

### REQUIREMENTS

Any Newton device running Newton 1.x operating system or later; 400K required; card recommended.

SRP: \$139.00. Call to order. Visa, MasterCard, and American Express accepted.

#### Balcones Software

13102 Briar Hollow Drive

Austin, TX 78729

Tel: (512) 353-7289

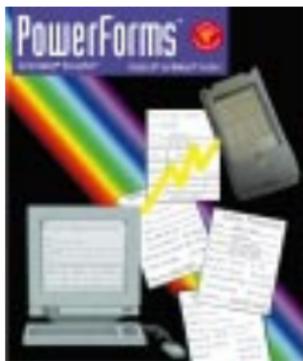

Fax: (512) 353-3005

Internet: [Balcones@azulita.cactus.org](mailto:Balcones@azulita.cactus.org)

## PowerForms

**P**owerForms™ is a complete mobile forms management system for businesses and professionals on the go. It allows you to create compatible forms for your Newton personal digital assistant (PDA) and desktop computer system.

### FEATURES

- ▶ Design forms on a Newton, Macintosh® computer or PC-compatible computer.
- ▶ Transfer information between your PDA and your desktop system.
- ▶ Include graphics, logos, and clip-art in your forms.
- ▶ Support multiple field types, and password protect your forms from editing.

SRP: \$119.00

Call Apple for availability.

### HealthCare Communications, Inc.

Tel: (402) 466-8100

Fax: (402) 466-9044

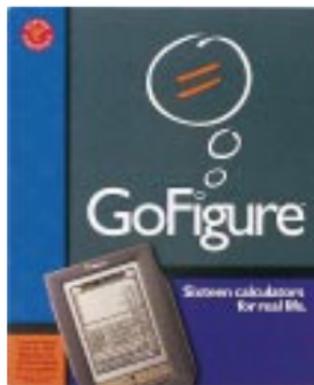

Sales: (800) 888-4344

## GoFigure

**G**oFigure™ offers over fifteen different calculators that allow you to easily solve everything from sales tax computations to cooking unit conversions and still have the power to solve scientific and statistical calculations. Professionals will appreciate GoFigure's powerful set of scientific, statistical and industry-specific calculators.

Part # M2741LLIA Disk

Call Apple for availability.

### Apple Computer, Inc.

US: (800) 708-STAR

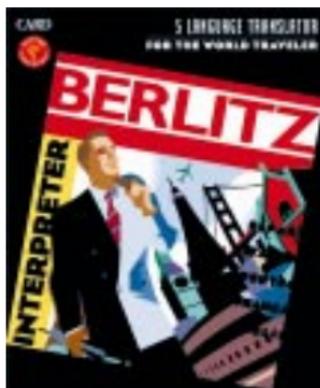

Canada: (800) 263-3394

All other countries, call your local Apple Computer subsidiary.

## Berlitz Interpreter

**B**erlitz<sup>®</sup> Interpreter is an easy-to-use translation program that lets you communicate in English, French, German, Spanish, and Italian. Simply write in a word, tap “translate,” and the translated word appears. Find phrase translations by tapping on the category and scrolling to the clear, idiomatic translation. It’s like having your own personal interpreter.

Part # M2748LL/A Card  
Call Apple for availability.

---

### Apple Computer, Inc.

US: (800) 708-STAR

Canada: (800) 263-3394

All other countries, call your local Apple Computer subsidiary.

## Gold Tee at BIGHORN

**E**njoy lifelike graphics and playing conditions as you play the BIGHORN golf course in Palm Desert—site of the annual “Skins” game. You select your club, plan your shot strategy, and control your swing power. You can even hook or slice your shot around obstacles and determine pin distance by simply holding the stylus on the course map. Up to four people can play at once.

Part # M3141LL/A Disk  
Call Apple for availability.

---

US: (800) 708-STAR

Canada: (800) 263-3394

All other countries, call your local Apple Computer subsidiary.

## proCALC Ex

**P**roCALC Ex is a powerful problem solving tool which couples RPN and SAN operating environments with flexible programming capabilities. Users can quickly add new functions with the built-in editor, and NTK programmers can develop add-on modules.

### FEATURES

- ▶ RPN or SAN data entry
- ▶ 70+ built-in functions
- ▶ User programmable
- ▶ Open architecture with plug-in modules

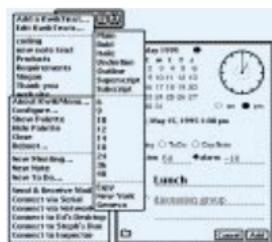

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later.

SRP: \$59.95. Includes Statistics and Finance Module. Call for pricing of the plug-in module API.

## KwikMenu

**T**he dashboard for your Newton! Makes your Newton device much faster to work with. Reduces many multi-step operations to a single tap, such as: new activity, computer connect, reboot, font styles, multiple clipboards, text glossary, and much more.

### FEATURES

- ▶ Three clipboards
- ▶ Unlimited text glossary
- ▶ New activity entry screen
- ▶ One tap meeting, to do, note

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later.

SRP: \$39.95. Includes ScrollingDoPopup and GestureLaunch packages!

Software for Terra Firma

## MusicPad

Compose music anywhere and anytime! Tap directly on the keyboard or the staff itself. Play back directly from the Newton PDA speaker. Select notes for easy copy/paste or adjust up/down in 1/2 step increments.

### FEATURES

- ▶ MIDI out
- ▶ Full grand staff
- ▶ Full, half, quarter, sixteenth notes and rests
- ▶ Multiple instruments and "voices"
- ▶ Beam/Print/Fax sheet music

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later, 2.0 recommended.

*Includes a metronome program and a music viewer/player for distributing songs.*

## Quicknames Pro

Provides a significantly faster and more flexible interface for Names. Supports incremental search on first, last or company name. Displays recently opened names and offers autosearch on selected text. Launch from the built-in Names icon.

### FEATURES

- ▶ Instantly displays recent names
- ▶ Custom card display
- ▶ Instant dialing
- ▶ Find any text in Names
- ▶ Also available in French and German

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later.

SRP: \$39.95

## MPG

Tracking your vehicle's maintenance and travel-related expenses has never been easier. MPG replaces the notebook in your glovebox—and with MPG's intuitive interface and powerful features, it's simple to record and calculate all the statistics you ever need to know about your car.

### FEATURES

MPG tracks:

- ▶ Vehicle costs
- ▶ Fuel economy
- ▶ Vehicle maintenance schedules
- ▶ Trips for income-tax purposes
- ▶ Multiple vehicles

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later; 120K RAM.

SRP: \$29.95

### Catamount Software

P.O. Box 8276

Essex, VT 05451

## PocketMoney

PocketMoney is an efficient financial package, powerful enough to be used as a stand-alone and flexible enough to work with other desktop applications. Its simple interface and diverse features make PocketMoney the perfect solution to your financial record-keeping and analysis needs.

### FEATURES

- ▶ Quicken Interchange Format (QIF) supported
- ▶ Unlimited number of accounts
- ▶ Split transactions
- ▶ Print checks and expense reports
- ▶ Fast data entry
- ▶ Simple interface

### REQUIREMENTS

Any Newton device running Newton 1.05 operating system or later; 100K RAM minimum.

SRP: \$39.95

### Catamount Software

## Gaia Forms

Gaia Forms are the easiest way for your mobile workers to fill out contracts, surveys, orders and other forms using their Newton PDAs. With Gaia Forms your workers in the field gather data only once—at the source—and offload it, route it to other Newton devices for more data entry or send it wirelessly to your corporate database servers.

### FEATURES

- ▶ Easy-to-use physical document metaphor
- ▶ Menu or handwritten entry
- ▶ Deliver and change forms electronically
- ▶ Self-check for accuracy and completeness

### REQUIREMENTS

Any Newton device running  
Newton 1.x operating system or later.

*Gaia Forms are inexpensive custom solutions for your field data gathering needs. Call for an estimate.*

## Newton Press

With Newton Press for Windows PC or Apple Macintosh computers, you can easily publish electronic documents, or Newton books for viewing on any Newton PDA. Using drag and drop technology, add word processing documents, graphic files, or simple text documents to Newton Press. Format your Newton Press document, create table of contents entries, establish simple links within your Newton Press document, title your book, and create your book as a Newton package. Distribute your book to anyone with a Newton PDA for viewing, annotating, faxing, or printing. It is ideal for creating meeting agendas, travel itineraries, or reference sales charts.

- ▶ Quickly create an electronic document of all your travel information for a business trip.
- ▶ Distribute meeting agendas to colleagues, complete with charts, graphics, and tables.
- ▶ Create company wide phone directories, employee handbooks and other information for distribution.

H0177LL/A Newton Press (Macintosh)

H0178LL/A Newton Press (Windows)

*With Newton Press, easily create electronic reference information such as a meeting agenda or company phone list.*

## Newton Backup Utility

Newton Backup Utility is a free software utility, distributed electronically, that lets you back up and restore information. NBU also allows you to select packages to download into your Newton PDA from your PC.

# Newton Connection Utilities

Integrate your Apple MessagePad or other Newton PDA with your existing Windows PC or Apple Macintosh computer. NCU provides direct synchronization between popular PC applications—such as Microsoft Schedule+, NOW Up To Date and Contact, and NetManage Ecco—and your Newton PDA. You can also export information from your MessagePad to your personal computer, install Newton software, and even use your PC keyboard to enter data into your Newton PDA. And when you are away from your desk you can use your MessagePad and NCU to access your PC information from anywhere via a modem.

- ▶ **Backup:** Create a backup file of your Newton PDA and restore information from your backup file to your Newton device whenever necessary.
- ▶ **Synchronize:** Directly exchange information between popular desktop applications and your Newton PDA.
- ▶ **Install Package:** Install Newton software onto your Newton PDA.
- ▶ **Import:** Import information from PIMs, word processors, or text files into your Newton PDA.
- ▶ **Export:** Export information from your Newton PDA to your personal computer in a variety of formats, including word processing and PIM formats.
- ▶ **Keyboard:** Use your PC keyboard to enter information directly into your Newton PDA.

## Equate 2.0

**E**quate™ is an advanced spreadsheet application designed with the Newton and Excel user in mind. It is a powerful tool standalone or when used with Excel. The “Desktop Direct” software that is included allows fast and easy importing of Excel workbooks. You can scroll, cut, copy and paste, just like on your desktop. Write directly on cells for quick analysis. Its advanced search function locates information fast. The professionals choice!

SRP: \$99.00

### FEATURES

- ▶ Excel 5.0/4.0 import/export
- ▶ 50+ Excel compatible formulas
- ▶ Resizable columns
- ▶ Cell formatting
- ▶ Screen rotation
- ▶ Two zoom modes
- ▶ Label locking
- ▶ In-cell editing

### REQUIREMENTS

Newton 2.0 operating system; approximately 290K storage.

# Now Synchronize

## Stay In Sync with Now Synchronize

**N**ow Synchronize gives you the ability to share the same calendar and address book between your Macintosh and your Newton device. It combines with Now Up-to-Date & Contact—to create the first truly portable information manager for Newton users.

Make changes to your schedule and address book on your Newton device, and Now Synchronize updates your desktop calendar and contact files automatically.

With Now Synchronize there's never any retyping or duplicate data entry—Now Synchronize automatically merges the changes you've made in both your Newton and desktop files, allowing you to stay fully in sync!

*Now Synchronize*

SRP: \$29.95

*Now Up-to-Date &*

*Contact* SRP: \$149.95

## FEATURES

- ▶ Three easy steps to synchronize: connect your Macintosh and Newton device, launch Now Synchronize, and click "Connect and Synchronize."
- ▶ Does not require Newton Connection Utility.
- ▶ Accelerated for Power Macintosh.®

## REQUIREMENTS

Any Newton device running Newton 1.3 operating system or later, and Now Up-to-Date & Contact 3.5 or later.

## DaynaCOMM Roamer

### You're Free to Roam with DaynaCOMM Roamer

The DaynaCOMM PCMCIA Roamer is a Type II PC Card for the MessagePad and PowerBook® offering mobile users a convenient wireless connection to Local Area Network. The PCMCIA Roamer includes a small integrated antenna and draws its power directly through the PCMCIA slot on the PowerBook or Newton device. The Network Access Point connects to the wired Ethernet network, receives radio signals from DaynaCOMM Roamers and transmits the signals to the wired network.

A serial version of the Roamer is also available for models without an available PC card slot.

### FEATURES

- ▶ Wireless range is 150 feet in an office, or 700 feet outdoors.
- ▶ Flash ROM feature allows updates through software.
- ▶ Security features include scrambling and frequency hopping options.

### REQUIREMENTS

At least one other DaynaCOMM (Roamer or Access Point) or Xircom Netwave device with which to communicate; any Macintosh computer (Macintosh with PCMCIA slot for PC card version). For more information, call Dayna Communications at (800) 44-DAYNA.

## PocketCall 2.0

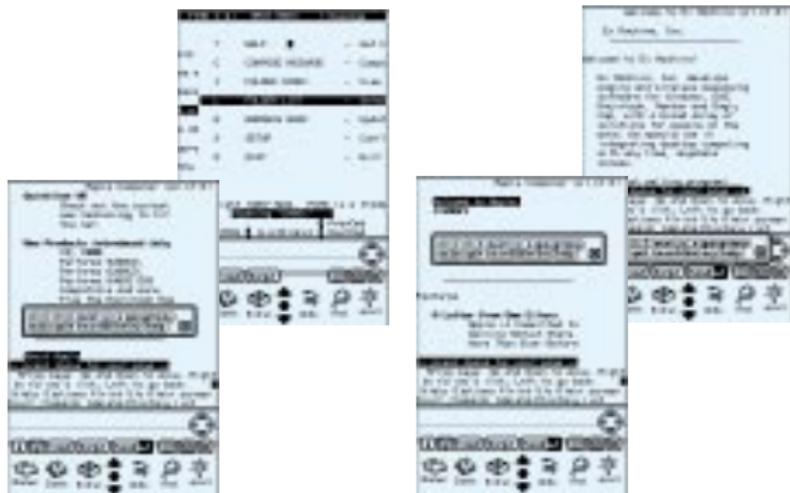

### Remote Access to Your Favorite On-line Service, BBS or Internet Sites

Surf the internet with Newton's only intelligent communications assistant. PocketCall 2.0 provides text-based terminal emulation for popular on-line services, bulletin boards, the Internet and the World Wide Web. With support for TTY, VT100 and Lynx terminal emulation, PocketCall also connects MessagePad users to existing corporate information and e-mail systems. It includes advanced scripts for popular on-line services.

### FEATURES

- ▶ Lynx protocol support for Internet access
- ▶ Lynx keypad for Internet navigation
- ▶ VT100 terminal emulation
- ▶ Connection scripts for Compuserve, MCI Mail, Delphi and Netcom
- ▶ Increased display area to 24 lines on MessagePad 110/120
- ▶ Improved scripting language with conditional statements, and sending/capturing of notes and looping
- ▶ Bundled Netcom Internet Shell Account

# Mail on the Run!

## Access E-mail From any Location

**M**ail on the Run! offers Newton users unprecedented remote access—over telephone, cellular and wireless networks—to the world's most popular LAN-based e-mail systems, including Microsoft Mail and cc:Mail.

Mail on the Run! utilizes the client/agent/server model. The “client” software runs on all Newton devices, and the “agent” software runs on either a Windows 3.1 desktop or Windows NT station. All this allows wireline or wireless communications with the user's e-mail system from any location.

## FEATURES

- ▶ Integrated into Newton's user interface
- ▶ Ability to send, receive, store, forward and reply to messages
- ▶ Unique download filtering capabilities
- ▶ Data compression and encryption for cost savings and security

## REQUIREMENTS

Any Newton device running Newton 1.x operating system or later with at least 250K available memory.

*Contact Bob Perry or Taffy Holliday at the phone number or e-mail ID shown below.*

## LUNATECH RESEARCH

## LunaMail V2

LunaMail is a flexible modular mail client or "communications engine" for the Newton, which enables you to exchange wireless information from a desktop computer or another Newton PDA via e-mail. LunaMail is a perfect vehicle for the integration of Internet resources, and wireless technologies, into work-flow and other messaging systems.

### FEATURES

- ▶ Works under Newton 2.0 operating system
- ▶ Uses built-in Newton resources
- ▶ Internet modules (POP/SMTP/IMAP) and others
- ▶ Supports MIME formatted messages

### REQUIREMENTS

Any Newton device running Newton 2.0 operating system; E-mail account and access.

For additional LunaMail information:

## MessagePad Charging Station

Plug your MessagePad 120 into this charging station to run it on AC power while recharging its batteries. You can simultaneously quick-charge its external battery pack in two to three hours.

*MessagePad Charging Station includes one nickel-cadmium battery pack, station, adapter, and pen; charges spare MessagePad 120 rechargeable battery pack while charging MessagePad 120 internal battery pack.*

**H0073LL/A**

## Power Adapter

The Power Adapter lets you run your MessagePad or Fax Modem using AC power and a rechargeable battery pack for the MessagePad 120. It comes in several versions to meet international power requirements.

*Power Adapter outputs 7 volts at 0.5 amp, universal 100 to 240 volts, in-line adapter for U.S., Canada, and Japan.*

**H0003Z/A** (USA)

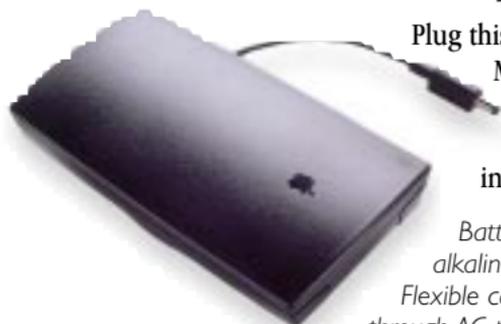

**H0011Z/A** (Int'l)

**H0011B/A** (GB)

**H0011X/A** (Australia)

## Battery Booster Pack

Plug this portable pack's cable into your MessagePad, and its eight AA alkaline batteries add hours of running time. Batteries are not included.

*Battery Booster Pack holds eight AA alkaline batteries for extended mobile use. Flexible cable connects to MessagePad through AC port.*

**H0010LL/A**

## Rechargeable Battery Pack

This rechargeable nickel-cadmium battery pack can be one of the most effective ways to keep your MessagePad running.

*Includes one nickel-cadmium battery pack.*

**H007LL/A**

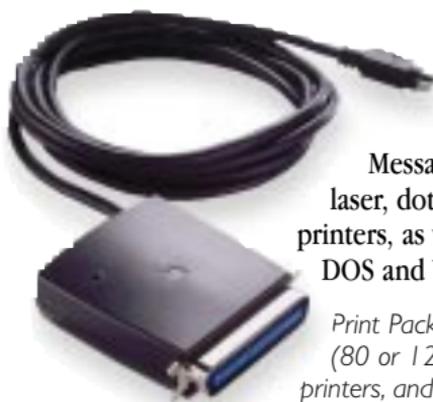

## Print Pack

The Print Pack allows you to use your parallel printer with your MessagePad. It works with most popular laser, dot-matrix, portable ink-jet, and thermal printers, as well as printers compatible with MS-DOS and Windows-based computers.

*Print Pack works with parallel printers, dot matrix (80 or 120 column), multiform printers, portable printers, and HP Deskjet and Laserjet printers.*

**H0015LL/A**

## MessagePad Telescoping Pen

This pen is designed to fit perfectly in your MessagePad 120.

**H0076LL/A**

# FieldWorker

## The GPS Edge in Hand Held Data Collection

**F**ieldWorker™ provides truly portable site-specific data collection by building a bridge between a Global Positioning System (GPS) receiver, a Newton device, and a DOS, Windows or Macintosh workstation. FieldWorker software provides flexible, rapid data collection with sophisticated GPS features such as parallel processing, equipment linkage testing, and GPS averaging.

Data is entered using dynamic pick lists, slider bars and notes. The integrated upload facility transmits data for use in spreadsheets, databases and GIS systems.

### FEATURES

- ▶ The plug and play solution linking your workstation to GPS and a Newton device
- ▶ Location tagged data collection for up to twenty concurrent projects
- ▶ Integrated data upload
- ▶ 2MB flash card
- ▶ Newton to DOS, Windows, or Macintosh cable
- ▶ Universal Newton-to-GPS cable

### REQUIREMENTS

Newton 2.0 operating system (reduced capability with Newton 1.x operating system); GPS receiver with RS232 port; PC with terminal emulator.

SRP: \$399.00

## Locator 110

### Accurate Longitude and Latitude Global Positioning System (GPS) for the Mobile Professional

The Locator 110 is a GPS device the size of a computer mouse. It attaches to the Apple MessagePad's serial port and provides its own power, so it will not draw down the MessagePad's batteries.

Using atomic time signals from earth-orbiting satellites and converting the data into longitude and latitude, the Locator 110 offers street corner accuracy.

FieldWorker software now brings GPS capabilities to the mobile professional for increased productivity in conjunction with the MessagePad device and the Trimble Locator.

### FEATURES

- ▶ This true plug and play for the mobile professional combines the power of GPS with the easy-to-use FieldWorker software.
- ▶ Trimble's WinMobile software provides a convenient tool for Newton developers to easily add GPS to their applications.

### REQUIREMENTS

FieldWorker software requires the Newton 2.0 operating system (reduced capability with Newton 1.x operating system); PC with terminal emulator. Locator 110 requires an Apple MessagePad.

SRP: \$495.00. Call Navtech to purchase FieldWorker Software.

# Newton Software Development

Newton 2.0 provides a rich, powerful platform for developing custom software solutions. Apple provides a wide range of tools, training, and support programs to ease the task of writing software for Newton PDAs, including Apple's MessagePad and Motorola's Marco Wireless Communicator.

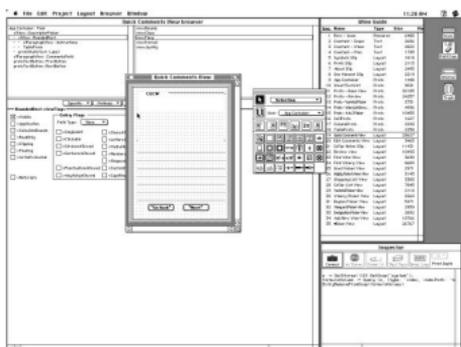

## Newton Tools:

### Newton Toolkit for Macintosh, Version 1.6

### Newton Toolkit for Windows, Version 1.6

(estimated availability for Windows: December, 1995)

With Newton Toolkit, you can easily create software that runs on any Newton PDA. The Newton Toolkit is a development environment that reduces the complexity and time involved in creating great software products. Its rapid prototyping features, rich library of extensible components, graphical user interface editor and interactive development cycle let you see results in seconds. This helps you bring products to market faster. Newton Toolkit also includes both a NewtonScript compiler and profiler that enable you to create much faster Newton applications.

### Desktop Integration Libraries

### (DILs) for Macintosh and Windows, Version 1.0

Desktop Integration Libraries (DILs), included with Newton Toolkit, provide complete APIs on your Macintosh or Windows PC enabling you to have complete access to data stored in a Newton PDA. Using this API, you can directly synchronize data between Macintosh or Windows applications and Newton data storage.

### Newton Book Maker for Macintosh, Version 1.1

### Newton Book Maker for Windows, Version 1.1

(estimated availability for Windows: December, 1995)

Newton Book Maker is a tool for professional publishers that enables the creation of electronic books, travel guides, reference materials, and corporate documentation for Newton PDAs. It allows you to easily create sophisticated, customizable, and easy-to-navigate electronic documents, called Newton Books, from files (such as word processing documents) containing both graphics and text. Newton programmers can use Newton Toolkit objects and the NewtonScript language to fully extend and customize Newton Books.

## Newton Developer Support Programs:

Apple offers a wide range of support programs to help you create software for the Newton 2.0 platform. These include the Newton Associates program, the Newton Associates Plus program, and the Newton Partners program. These programs feature a monthly developer mailing, including a developer CD and the *Newton Technology Journal*. Access to special developer information on eWorld, discounts on training and Apple hardware, and varying levels of technical support via e-mail.

## Newton Developer Training:

The fastest way to come up to speed on Newton 2.0 development is by taking advantage of the Newton Developer Training courses. These courses will cut your learning and development time while providing you the expertise needed to write useful and powerful Newton 2.0 applications. Keep your eye out for the release of Newton Programming self-paced and online courses as well.

For more information, to receive a course schedule or to register for a class, contact the Developer University Registrar at 1-408-974-4897 or fax 1-408-974-0544.

### Newton Programming: Essentials 2.0 - 5 days

Learn how to develop applications for Newton using NewtonScript and NewtApp, and how to develop and optimize your Newton 2.0 applications using Newton Toolkit (NTK). Communications are briefly overviewed.

### Newton Programming: 1.x to 2.0 - 5 days

Here's your opportunity to learn about the many changes in all areas of Newton System Software for version 2.0, how to write a 2.0 application, and how to convert and make your 1.x Newton applications 2.0 savvy.

### Newton Programming Self-Paced Training (estimated availability: January, 1996)

Soon to be released are Newton Programming Self-Paced training courses which will provide you with convenient and inexpensive access to Newton Developer training. Included with this training are technical articles, step-by-step coding labs, illustrations, demos, online assistance, and sample code.

New courses will provide training in the areas of Communications, including State Machines, Desktop Integration Libraries (DILs), transports, and the creation of communication endpoints; and Extended Topics, including how to improve your application design skills and performance techniques.

## Books and CD-ROMs for Professionals

### BASIC for the Newton: Programming for the Newton

#### Using NS BASIC

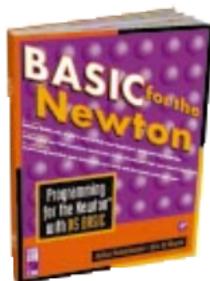

John Schettino & Liz O'Hara

July 1995

Paperback/Disk with Demo NS BASIC

\$34.95

ISBN: 0-12-623955-X

This book shows owners of Newton devices how to become Newton programmers using BASIC. The authors use a straightforward, "programming by example" approach. The enclosed 3.5" disk contains demonstration NS BASIC and over fifty example programs from the book.

### Newton's Second Law: The Digital Nomad's Guide to Newton 2.0

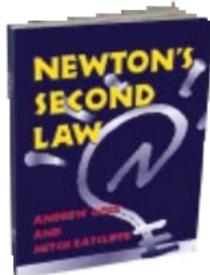

Andrew Gore & Mitch Ratcliffe

January 1996

Paperback/CD-ROM

\$24.95

ISBN: 0-12-291655-7

Get the most out of your Newton with advice from the experts. Best-selling authors Andrew Gore and Mitch Ratcliffe bring you the authoritative guide to version 2.0 of the Newton operating system.

### Newton 2.0 Solutions: Taking Apple's PDA From Toy to Tool

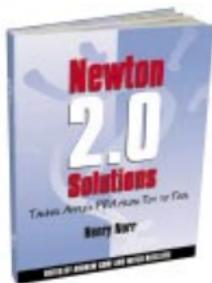

Henry Norr

1996

Paperback/CD-ROM

\$24.95

ISBN: 0-12-291652-2

This authoritative guide to Newton 2.0 software tells you what's good, what's bad, and how to get the most from your Newton. From commercial applications to the best shareware and hardware available, get the experts' views on the Newton tools you need and don't need.

### About the Authors:

**Julie McKeehan** and **Neil Rhodes** are external faculty at Apple Developer University.

## Programming for the Newton Using Windows

Julie McKeehan & Neil Rhodes

December 1995

Paperback/Disk with Demo NTK for Windows

\$34.95

ISBN: 0-12-484830-3

This book provides hands-on Newton development training with sample code created specifically for the Newton with NewtonScript. All the key features of Newton Toolkit for Windows are covered, and the enclosed 3.5" disk contains programming examples

from the book, as well as a demonstration Newton Toolkit for Windows.

## Wireless for the Newton: Software Development for Mobile Communications

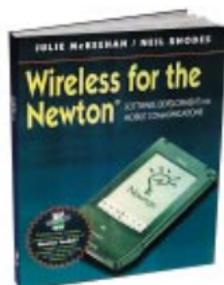

Julie McKeehan & Neil Rhodes

May 1995

Paperback/Disk with Demo NTK

\$34.95

ISBN: 0-12-484801-X

This book describes wireless technology as it relates to the Newton, discussing both current technologies and future directions. All aspects of communication with the Newton are covered, including printing, faxing,

beaming, and mail. The enclosed 3.5" disk contains a sample Newton application from the book, as well as a demonstration version of Newton Toolkit (NTK).

## Programming for the Newton: Software Development with NewtonScript

Julie McKeehan & Neil Rhodes

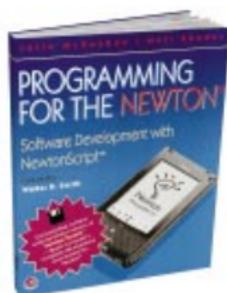

Paperback/Disk with Demo NTK

\$29.95

ISBN: 0-12-484800-1

"A real Newton programming book has finally arrived... Now would be Newton developers can not only learn about NewtonScript, but they can actually write real programs and hone their NewtonScript skills without having to pay \$795 for the full-blown version of NTK."

—PIE Developers

## Systems Integration

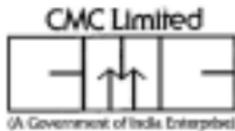

CMC Group consists of:

- 800 software developers
- 700 field engineers

Vertical market expertise in:

- Finance & Banking (stock exchange, mutual funds, retail banking)

- Electric Utilities (real-time data acquisition, load dispatch)
- Healthcare Professionals
- Transportation (pax reservation, container terminals-ports, cargo management, timetabling: suburban metros)

(A Government of India Enterprise)

BATON ROUGE INTERNATIONAL, INC.

The Global Information Technology Company

### FEATURES

- ▶ On-site consultancy and off-shore development
- ▶ Access to pool of skilled engineers—significant cost savings
- ▶ Turnkey responsibility
- ▶ Systems integration

### REQUIREMENTS

Custom developed to your needs. CMC has implemented projects for a diverse number of manufacturers.

## Software Development

**B**ear River Associates has provided software development and systems integration services for over ten years, and has been providing these services for the Newton platform for the past two years. We have a reputation for providing high-quality, high-value services for clients such as Apple, Microsoft, Becton Dickinson, Prodigy, South Western Publishing and many others. Bear River can help you with any project—from small projects up to multiyear projects that require a large development team of 10 or more engineers. We have extensive experience with Newton development, using the latest tools such as: GPS, GIS, and barcode reading. Also, our software is developed to communicate cross-platform to database systems such as Lotus Notes and Oracle.

Fax: (916) 325-0101

Internet: jbecker@bearriver.com

## NS BASIC

NS BASIC enables you to rapidly and easily create your own custom applications and has a full implementation of the BASIC programming language. Its extensions optimize the rich Newton environment. Program directly on your Newton device, or download from your Macintosh or PC. Easy-to-use interactive development—develop and run your program immediately.

### FEATURES

- ▶ Lots of window objects
- ▶ Pick lists, checkboxes and handwriting
- ▶ Serial and IR comms
- ▶ Indexed files
- ▶ Graphing and scientific calculations
- ▶ 240-page instructional handbook

### REQUIREMENTS

NS BASIC is supplied on DOS and Macintosh format diskettes, and runs on any Newton device running Newton 1.x operating system or later.

SRP (US): \$99.00 plus \$5.00 shipping. Visa/MC.

Order direct by fax, phone or WWW or from your Newton dealer.

## WRIGHT STRATEGIES

### FormLogic 1.1

FormLogic (formerly OmniForm) is a PC/MAC development environment enabling users to create and deploy turnkey data collection solutions for Newton PDAs. FormLogic includes an extensive library of data collection “agents”, a comprehensive scripting language, and a full communications subsystem. It is the ideal tool for developers, VARs, and system integrators!

### FEATURES

- ▶ Powerful scripting language
- ▶ Robust Server/Forms Administrator
- ▶ Form record dispatching
- ▶ Supports wireless LAN devices

### REQUIREMENTS

Macintosh: System 7.0 or later, 2MB; PC: Windows 3.0 or later, 486, 2MB;

Newton: 1.3 operating system or later, 300K.

FormLogic Builder SRP: \$895.00 (includes 1 Runtime); FormLogic Server SRP: \$1095.00;

Additional Newton Runtime SRP: \$195.00

### Wright Strategies

<http://www.ardis.com>

## RIVER RUN SOFTWARE GROUP

### Corporate Connection for Newton

Corporate Connection is a toolkit with APIs that enables developers to embed connectivity over wireline and wireless networks seamlessly within their applications. APIs include Sockets interface, ODBC access, file transfer, and terminal emulation. Additional features include data compression and encryption.

*Size of application: 150K  
Pricing available on request.*

**River Run Software Group**  
8 Greenwich Office Park  
Greenwich, CT 06831  
Tel: (203) 861-0090  
Fax: (203) 861-0096

CompuServe: 72662,3247

## NUMINA SYSTEMS, INC.

### Mobile App Builder

This development environment creates wireless applications without having to do any Newton Script or NTK programming. Access database and other information directly from your Newton device. The product includes a wireless gateway server, client software and user interface development tools. Applications created with this system can be wirelessly downloaded to the Newton device and other PDAs supported by the product.

*Requirements: Newton device (e.g. Message Pad, Motorola Marco); PC running Windows NT. Pricing on request.*

**Numina Systems, Inc.**  
95 Horatio Street, Suite 3N  
New York, NY 10014  
Tel: (212) 759-2407  
Fax: (212) 644-0024

# DietLog 2.0 *your personal diet assistant*

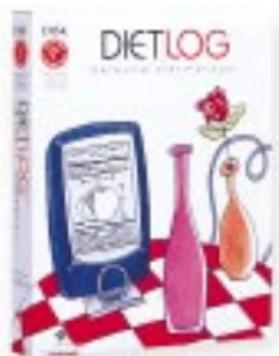

## Features

- Analyze nutrient content by food, meal, day or week
- Expandable 2500 foods x 15 nutrient database
- Advanced clinical logic
- Precisely balance calories eaten with calories burned
- Track progress with motivating prompts, gauges, graphs, and charts
- Generate diet guidelines & targets from your personal health goals

## Recipient of a National Institutes of Health Research Award

Keep track of everything you eat anytime, anywhere...with accurate and informative nutrition facts & data always at your fingertips. Easy to use meal and activity planning, tracking, and analysis. Use with any diet, for any reason, or let DietLog design one that is just right for you.

## Requirements

PDA running Newton 2.0 operating system and 1MB memory.  
(1.x version available)

## Suggested Retail Prices

DietLog2.0 for PDA:	\$89.00	DietLog for Windows PC:	\$89.00
FitLog PDA module:	\$49.00	DietLog PDA-PC bundle:	\$129.00
Diabetic PDA module:	\$49.00	More Foods (5,000):	\$39.00

Call for dealer and special pricing.
